

# **Production Supporting Systems in Factories**

**ระบบสนับสนุนการผลิตในโรงงานอุตสาหกรรม**

# **Module 2-1: Line Notify**

- ສ້າງກຸ່ມ LINE ກາຍໃນ Group
- ໄປທີ່ <https://notify-bot.line.me/en/>
  - Login (need to verify number on smart phone)
  - Go to My page
  - Click Generate token
  - Enter Token Name and select a chat room.
  - Copy the token and store it somewhere.

- Back to Node-Red
- Create an inject node
  - Set msg.payload to (JSON) {"message":"Hello"}
  - Set msg.headers to (JSON)

```
{  
  "Content-Type": "application/x-www-form-urlencoded",  
  "Authorization": "Bearer <<YOUR LINE TOKEN>>"  
}
```

- Create an `http request` node
  - Method: `POST`
  - URL: `https://notify-api.line.me/api/notify`
- Router the output to the debug node.
  - So that we can inspect the error.
- Try injecting to see if the notification is working or not.
